

## R7 EP SERIES

The R7 EP Series of linear fluorescent luminaires features soft glow freestanding light columns ideal for mounting in both exterior and interior applications. Their slim tubular design is an innovative way of illuminating public areas, which have unique

specification requirements. Train stations, public parks, restaurants, malls, as well as pathways and decorative gardens are just some of the endless applications that lend themselves to the R7 EP Series.

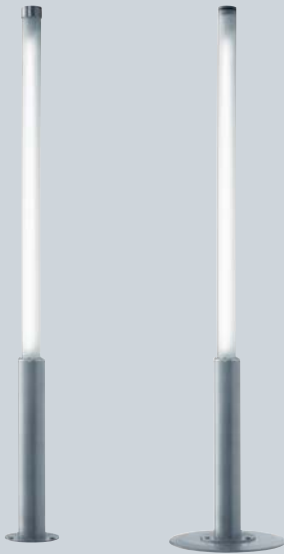

# R7 EP SERIES

The R7 EP Series uses our 2.75" (70mm) outer diameter tube, which is waterproof, impact-resistant, and uses a specially designed acrylic polymer. It resists weather and UV radiation for long tube life and color clarity. The pedestals are vandal resistant and are suitable for indoor or outdoor applications. With their slim, minimalistic design, the R7 EP Series works perfectly for both new construction and renovation projects.

Features include:

- Dimming with virtually any available system
- Indoor free-standing base for portable applications
- Bolt-down vandal resistant flange
- Lengths range from 52 to 90 inches with a 2.75" (70mm) outer dimension
- IP67 waterproof
- 360° illumination
- Impact resistant polymer tubes
- Other options may be available, consult factory
