

OPTICLUXLED MAGNIFIER LUMINAIRE

Peerless light field

Oversized 6.3" wide lens, 1.9x (3.5d) magnification and adjustable step-free dimming.

Ergonomic handling

Spring-balanced arm and friction joints allow smooth handling without the luminaire head drifting or drooping.

Long service life

Premium high-powered LEDs, scratch-resistant special-coated lens and precision components ensure strength and durability.

Flexible positioning

Long easily maneuverable joints and ergonomically-tested arm for ease of use and reliable precision.

What is a Wood light and why is it important?

A Wood light examination is a test that uses ultraviolet (UV) light to look at the skin closely. The test is usually done in a dark room. The dermatologist will turn on the Wood light and hold it 4 to 5 inches from the skin to look for color changes.

OPTICLUX and Wood light.

The special model option for dermatologists, veterinarians and forensic medicine combines two lighting modes in one device: daylight white illumination and Wood light. With the flip of a switch, the practitioner is able to use the right tool for whatever task needs to be done. A variety of examination types can be performed with just one light. Other Wood luminaires require the room to be completely darkened. Thanks to powerful BLB LEDs, the Opticlux does not require this.

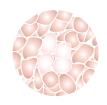

For radiation of certain dermatomycoses to obtain diagnostic indications based on the fluorescence that occurs:

- RINGWORM
- ERYTHRASMA (red fluorescence)
- MICROSPORIA (weak green fluorescence)
- FAVUS (bilious green fluorescence)
- PITYRIASYS VERSICOLOR (yellow ochre colored fluorescence
- VITILIGO (blue-white fluorescence of depigmented areas)
- SCABIES (gray-white mite tracks)

Also for fluorescence diagnostics (FD) for in-vivo diagnostics of dysplastic tissues and surface tumors in connection with local or systemically applied pigment, such as PPIX or 5-ALA.

LED light & dimming

Reliable color rendering

Premium 6500 K LEDs ensure less shadow formation and optimal color rendering (CRI / Ra > 93, R9 > 90, R13 > 95)

Wood light (365 nm)

Accurate diagnosis: Skin variations appear more distinctive under the Wood light, a must in dermatology as well as many other fields of medicine.

Special for dermatology *

Two lighting modes in one device: optional Wood light for examining lesions and pigment changes

Effortless observation

90 high-quality LEDs, low-shadow illumination; adjustable step-free dimming and a 1.9x (3.5d) wide-angle lens ensures clear, even viewing.

Precise positioning

Light arm made of aluminum and fiberglass-reinforced friction joints ensure long life and highly accurate positioning despite low weight.

More economical, reliable use

High-efficiency LED light technology saves energy and ensures long-term maintenance-free operation.

Simple, versatile mounting options

The only magnifier luminaire in its segment that is available as a ceiling version as well as the 16mm pin-mount version for mounting on wall, table, rail and rolling floor stand.

Easy cleaning

Lens cover, keypad and premium housing for fast cleaning.

Optimal color rendering

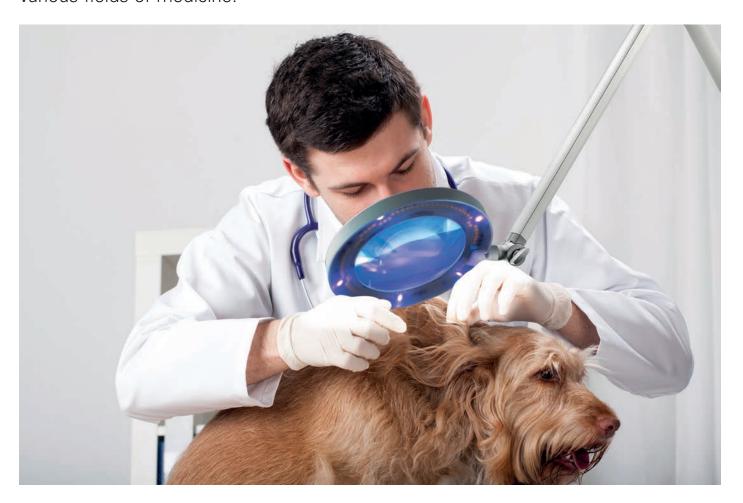

Especially skin and red tones are reproduced close to optimal daylight; color rendering Opticlux CRI / Ra > 93, R9 > 90, R13 > 95.

ONE MAGNIFIER LUMINAIRE.

MANY APPLICATIONS.

Very few magnifier luminaires are tested medical devices according to EN 60601-1. With its unique light quality and sophisticated design, OPTICLUX is ideal for use in various fields of medicine.

Veterinarians

Free hand:

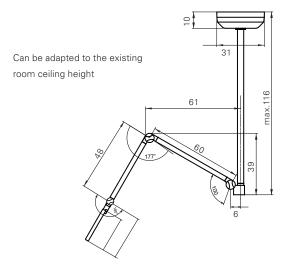

- Flexible mounting options: ceiling, wall, rail, or rolling floor stand plus hand held
- Large light field
- Optimal magnification for examination and treatment of various animals

The Wood light version is recommended for optimal diagnosis of skin diseases.

CEILING VERSION

Ceiling mount

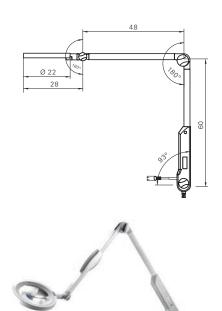

PIN-MOUNT VERSION

Wall mount

OPTICLUX Family at a glance

- Color temperature daylight white 6500 K *
- Magnification 1.9x (3.5 diopters)
- 6.3" specially-treated hard acrylic magnifier lens with protective lens cover
- Color rendering properties *: CRI > 93, R9 > 90, R13 > 95
- Light field: 6000 lux / 0.15 m *
- Continuously dimmable 100% of 10%
- Several mounting options available
- Complies to EN-60601-1 standards

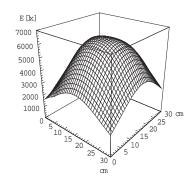

• Optional Wood light: Peak at 365 nm

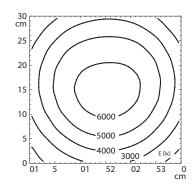

Illumination intensity

* -10%/+20% tolerance

- Homogeneous and very bright light field * (8,000 lx at 0.15 m)
- USB-C interface
- 3 hours of battery life
- · Optional charging stand
