## WHERE PET PARENTS GET ANSWERS QUICKLY!

### BOND VET

Since the first clinic opened in June 2019 in Cobble Hill, Brooklyn, Bond Vet has treated tens of thousands of cats and dogs nationwide. And as they've grown, they've expanded services into those of a full-service veterinary clinic, offering their trademark urgent care, as well as routine care, like wellness exams, vaccines and spay/neuter, plus surgeries, dental cleanings, and international health certificates. And for such expansive care, Bond Vet turned to Waldmann Lighting to provide a perfect fit for lighting solutions.

**Challenge:** When choosing lighting for their new facilities, Bond Vet prioritized features that empower their teams to deliver effective care. This included LED technology with dimming capabilities, user-friendly design, aesthetic appeal, and a reputable industry standing.

**Solution:** Waldmann Lighting's TRIANGO LED 100 fulfilled all of these criteria by providing Bond Vet teams with essential components for illuminating procedures and promoting quality care. For general examinations, the dimming functions have added comfort for the animal and vet team, while shadow control and ease of movement provide flexibility with performance during procedures. Bond Vet uses Waldmann Lighting fixtures at all 47 of their current locations.

Bond Vet is dedicated to strengthening the human-animal bond and promoting employee well-being. Waldmann's corporate ethos, focused on the "human factor," aligns perfectly with Bond Vet's mission, fostering mutual success.

All of the pet-loving team members at Waldmann Lighting are happy to be part of this effort!
