
IDOO.LINE

POWER OVER ETHERNET (PoE)

SUSPENDED DIRECT/INDIRECT LUMINAIRE

IDOO.line, Waldmann's LED direct/indirect suspended linear luminaire, is available in a single or modular system of standard 4ft or 8ft sections interlinking using different start, middle and end luminaires for creating light lines up to 60 feet. Featuring efficiency-boosting reflection technology and a conical prismatic screen, IDOO.line ensures uniform illumination of the workspace.

The luminaires are also maintenance-friendly due to easy access to the driver and mechanical and electrical connection of the individual modules not requiring tools. LUM CONNECT VTL, biodynamic light control, that mimics the changes in sunlight that occur with the course of the day, can also be implemented with this fixture. (Accessories: Controller NET Module required).

suspended direct/indirect luminaire IDOO.line

fitted with	LED
work equipment	Molex
connected load	PoE
power consumption	approx. 12.5-50 W
luminous flux	approx. 1500lm - 6000 lm
luminous efficacy	approx. 119 lm/W
light distribution	direct/indirect, direct, indirect
direct ratio	40 % direct, 100% direct, 100% indirect
light color	3000K, 3500K, 4000 K, VTL (3000-5400K)
color rendering index (CRI)	> 80
consistent white light of	< 3 SDCM
glare-free	conical prismatic screen
luminance	< 2600 cd/m ²
unified glare rating	< 16
system of protection	IP 40
technology	power over ethernet
usage	internal PoE Driver
luminaire body	sectional aluminium, white acrylic clear
lamp cover	approx. 4.1 kg, 9.03 lb
weight (net)	approx. 1,0 m; with free stranded wires
mains lead fastening	steel cable 0.3 - 0.7 m, 1 - 2.3 ft
dimension	nominal 2ft, 3ft, 4ft, 5ft, 8ft, linear-x

Luminous Intensity

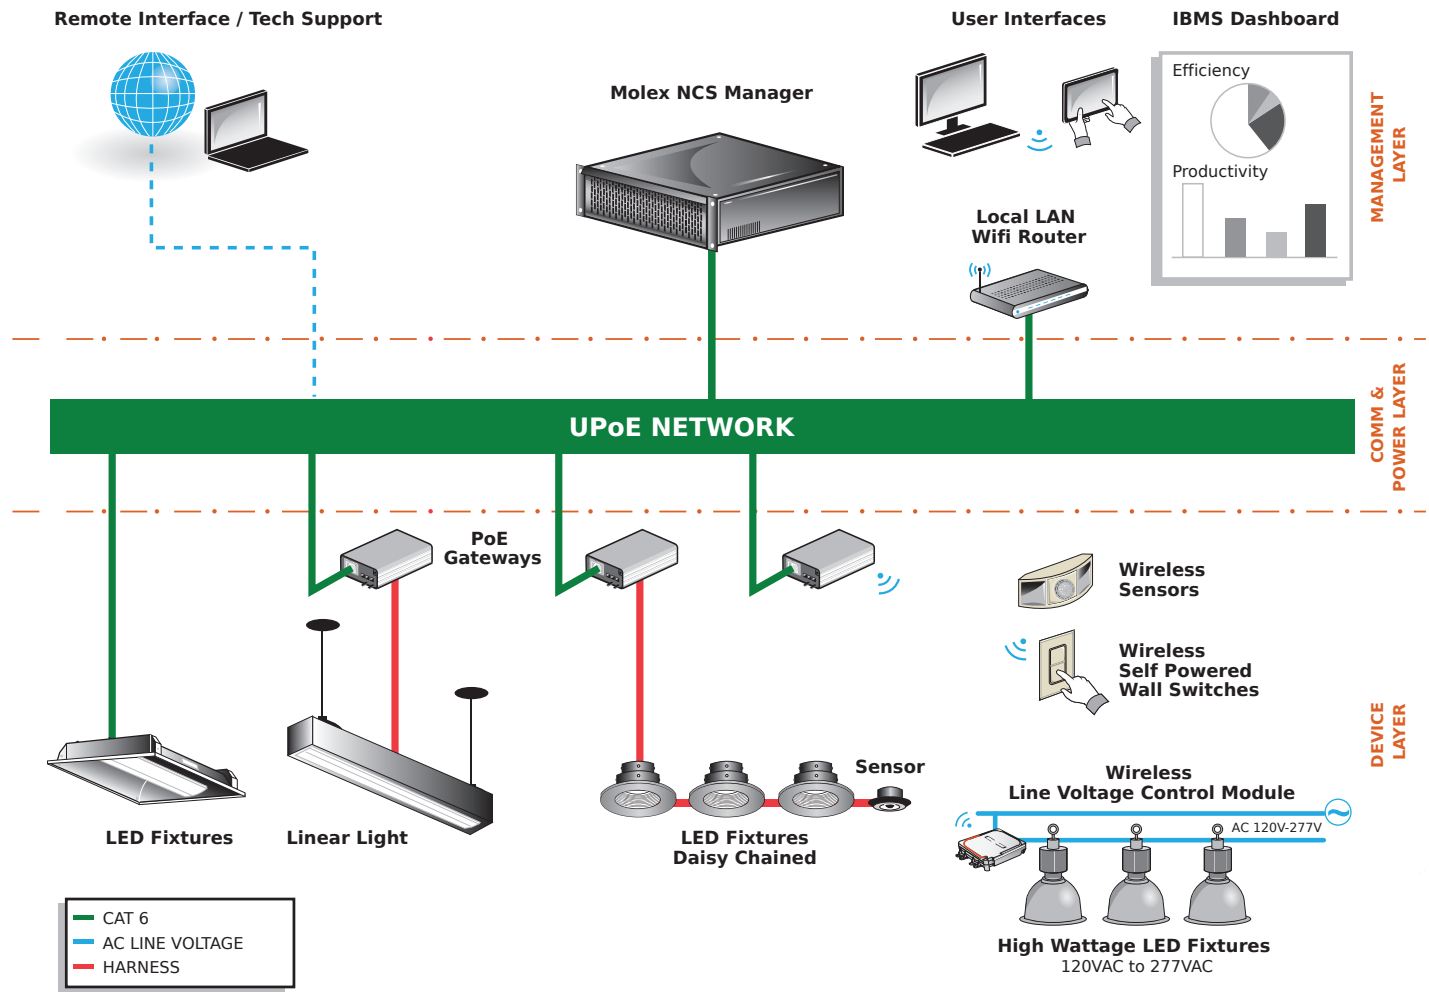

IDOO	- L	-	-	-	POE	-
Type	Mounting	Distribution	Length	CCT	Voltage	Color
	Linear Pendant - L	Indirect/Direct - ID	(Nominal)	3000K - 35	Power over	White - W
		Indirect Only - I	2 foot - 2	3500K - 35	Ethernet -	Black - B
		Direct Only - D	3 foot - 3	4000K - 40	POE	Gray - G
			4 foot - 4	2700 - 5700K - VTL*		
			5 foot - 5	* (Only available in 4ft increments)		
			8 foot - 8			
			LNx - enter x feet			
			in increments of 4ft			

Dimensions (in mm)

SYSTEM ARCHITECTURE

WHY PoE LIGHTING?

- Power and data over single-layer infrastructure
- Safe and cost effective to install
- Based on Ethernet standard
- Future proof and upgradable
- Human centric control with tunable luminaires
- Lights can be used to communicate information to users
- Can be integrated with other systems
- Highly secure
- Creates the possibility for new data analytic schemes

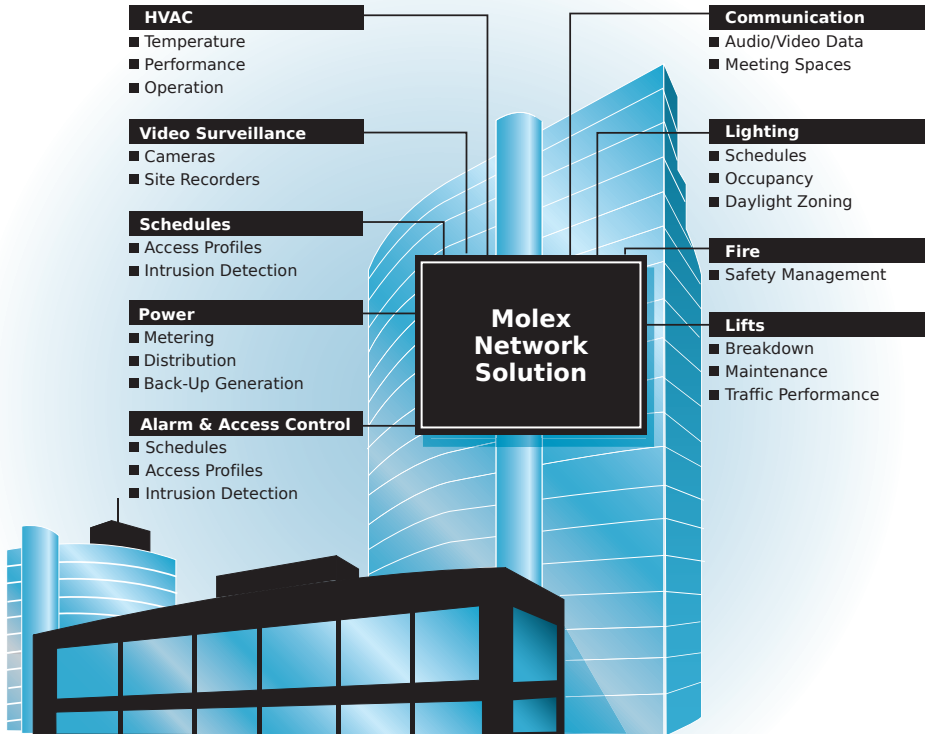

A NEW LIGHTING PARADIGM >

Lighting as a Service for Integrated Smart Buildings

The ability to migrate lighting controls to IP-based infrastructure makes lighting a service and an IoT building asset that can be controlled synergistically along with other building functions.

More integration means not only better control, but also more data and information being collected by a distributed sensor system as part of the lighting network.

Molex Network Connected Lighting will dramatically accelerate the integration of the IoT into commercial buildings.

WHY MOLEX: Together with leading construction engineering firms, Molex designs and optimizes solutions to improve operational efficiency and performance and to enhance occupant experience and productivity in offices, learning or healthcare facilities, hospitality, retail settings, industrial buildings, and others.

In the important area of LED lighting, we have worked with lighting fixture innovators and leaders, lighting designers and architects to develop connected solutions that define a new level in sustainability, ROI, property value and brand recognition.

A FULL SYSTEM SOLUTION WITH THE NCS ALLIANCE >

LIGHTS

The freedom to choose from a large variety of Waldmann NCS-ready lighting fixtures through our Alliance Partnership with the Molex Network Connected Solutions PoE system offers unique flexibility to meet lighting requirements without compromising aesthetics.

GATEWAYS

At the heart of the Molex Network Connected System, the PoE Gateway distributes power and connects luminaires, sensors and other devices to the NCS Manager. Each Gateway is connected to a Cisco® switch port with a Category cable, capable of receiving 60 watts using four pairs.

NETWORK EQUIPMENT

As a Cisco® Solution Technology Integrator, Molex integrates Cisco switches into the system.

NCS MANAGER

The Lighting Software Tool-set, leveraging amBX Smart Core technology, provides support during the complete lifecycle of a smart lighting control system, from design and installation to live operation and building maintenance. When compared to traditional methods, the Light Tool-set provides effective lighting in a fraction of the time.

SENSORS

Molex's Lighting Control provides an array of applications that enable the digital building. These applications feed multi-sensor information and data to a central host providing building analytics and applications: real time energy consumption, light status, temperature and humidity, occupancy, air quality, plus many more use cases.
