

D^{lite}® Vanera

DIRECT/INDIRECT HEALTHCARE & SENIOR CARE LIGHTING

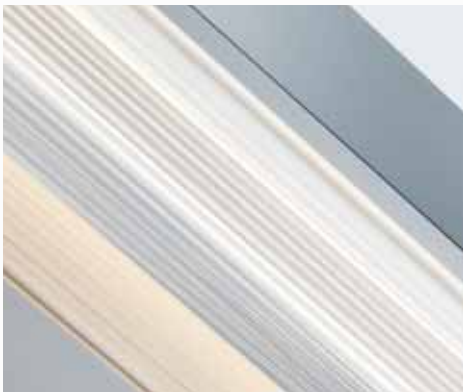

THE VANERA ROOM LIGHT

A STRAIGHTFORWARD DESIGN

Subtle design, high quality materials, intelligent lighting technology and energy efficiency: All components of a modern classic. Vanera's simple lines blend with any decor and enable Vanera to fit perfectly into any surrounding.

- **Light distribution:**
Direct/Indirect general lighting
Direct glare-free reading light
- **Light source:**
T5 fluorescent lamp
- **High quality materials:**
Strong anodized aluminum for a solid, sleek finish
- **Specially designed prismatic lens:**
Optimized asymmetric light distribution
Uniform illumination of the room
Glare-, reflection-, and shadow-free light
- **Meets current standards:**
EN 60598-1, EN 60598-2-1, EN 60598-2-25

D^{lite}® Vanera

VERSATILITY TO SUIT YOUR NEEDS

The D^{lite}® Vanera family is ideal for many different areas of a healthcare or senior care facility. There are several versions of the Vanera suitable for a number of applications. The newest addition to the product family is the single lamp Vanera One.

BASE AND VTL - Visual Timing Light

- Two fluorescent lamps T5 39W/54W (VTL with various color temperatures)
- Daylight tracking
- Available in 3ft or 4ft versions
- Electronic ballast (dimming optional)
- Aluminum panels on side/front
- Wall and Ceiling Mounted

ONE

- One fluorescent lamp T5 24W/39W/54W
- General lighting, direct/indirect
- Designed for corridors and low ceilings
- Available in 2ft, 3ft, and 4ft versions
- Electronic ballast (dimming optional)
- Wall and ceiling mounted

BED

- Two fluorescent lamps T5 39W/54W
- General lighting, indirect
- Examination light, direct/indirect
- Available in 3ft or 4ft versions
- Reading light, direct
- Electronic ballast (dimming optional)
- Wall mounted

BATH

- Two fluorescent lamps T5 24W
- General lighting, direct/indirect
- IP44 rating for wet location
- Electronic ballast
- Wall mounted
- Compact 2ft unit

QUALITY LIGHT

ENGINEERED AND MANUFACTURED FOR SUPERIOR PERFORMANCE

The Vanera's innovative technology features unique microprism technology, which minimizes reflections and reduces glare, while emitting a wide light beam for superb ambient light. It is ideal for illuminating corridors and patient rooms. Both ceiling and wall mounted versions are available.

CORRIDOR-CEILING

- Ambient direct/indirect general lighting
- Anti-glare lens technology
- Slim design provides seamless integration with architecture
- Microprism optics evenly distributes light to illuminate a large area

CORRIDOR-WALL

- Slim design provides seamless integration with decor
- Microprism technology emits a wide-spread beam to illuminate a large area
- Anti-glare lens technology
- Ambient direct/indirect lighting

BED- WALL

- Special asymmetric light dispersion
- Ambient lighting: indirect
- Examination lighting: direct / indirect
- Reading light: direct

BATH - WALL

- Soft, sun-like illumination
- Anti-glare light technology
- Slim design provides seamless integration with architecture
- IP44 rating for wet location

WALL AND CEILING APPLICATIONS

COMFORTABLE LIGHT DISTRIBUTION

Lighting in any healthcare facility should be functional as well as energy efficient. The Vanera accomplishes this while complementing a variety of healthcare environments with its clean line aluminum housing, and various design options. Since the atmosphere created with effective lighting has such a significant impact on patient, resident, and staff, Vanera is ideal for corridors and shared spaces in any facility. It lights the way comfortably - and with the VTL option, adjusts the light's color temperature to simulate natural daylight throughout the day.

PATIENT AND RESIDENTS' ROOMS FEEL AT HOME

Lighting a patient or resident's room is a multi-layered task that supports staff in their role and facilitates the well-being of the patient or resident. This room serves many functions: from exams and procedures, to entertaining visitors, relaxing, reading, and of course, sleeping. The Vanera's sophisticated microprism optic provides indirect light throughout the room. The direct light is ideal for reading or exams and care.

BATHROOM LIGHTING

ATTRACTIVE AND FUNCTIONAL

The restroom is a very important functional area in any care setting. Patient and staff need good quality and quantity of light. Critical accessories such as grab bars and towel bars must be clearly visible, and good lighting can make stepping out of the shower much safer. Unfortunately, this is not always the case, since bathrooms frequently do not have a window and are insufficiently illuminated. The Vanera blends with any decor, while offering "sun-like" lighting conditions: soft, uniform, glare-free illumination with an IP44 wet location rating.

CORRIDOR LIGHTING

PUBLIC SPACES

In an office setting, and in the healthcare industry in particular, it's important that corridors have sufficient lighting. Besides serving as a constant thoroughfare, they also act as social meeting places throughout the day. Quality lighting design will optically enlarge a corridor and give it a more open feeling. In addition, the Visual Timing Light option will adjust the lighting according to the amount of natural daylight coming in at any particular time of day or night.

LIGHTING STAIRCASES

REDUCING RISKS

Lighting design has many objectives, and in lighting a staircase, its primary objective is safety. Shadows and darkness make it very difficult to keep your bearings while making it up or down a flight of stairs. Vanera can be mounted on the wall or ceiling, providing clear, even lighting to prevent those risks and uncertainties.

VANERA ONE SMALL BUT MIGHTY

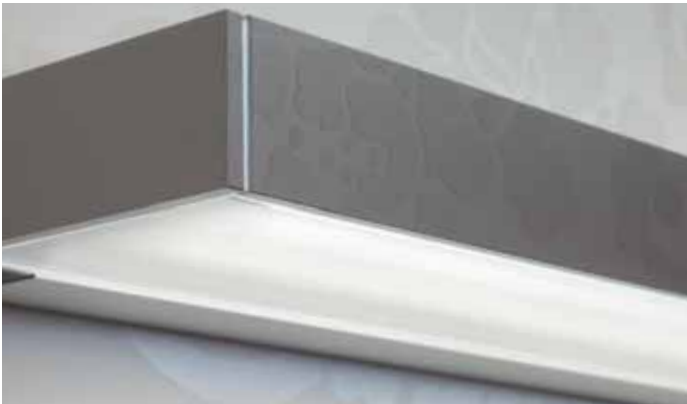

The Vanera One has the same design characteristics and quality materials as the other Vanera fixtures, but with a narrower footprint. Its new slimmer dimensions allow it to fit inconspicuously into area where space is limited.

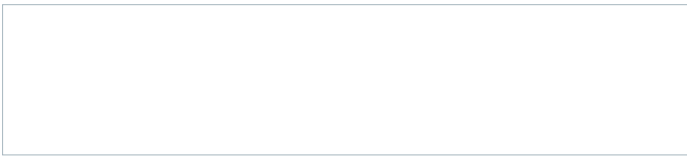

DESIGNS AND COLORS FOR YOUR UNIQUE STYLE

Every room has its own style and accessories can make all the difference. Vanera now offers decorative trims in many colors, patterns and wood designs, to complement any décor. These trims easily slide onto the outside edge of the fixture and completely change the look of the light. Match your walls, furniture or floors – be creative!

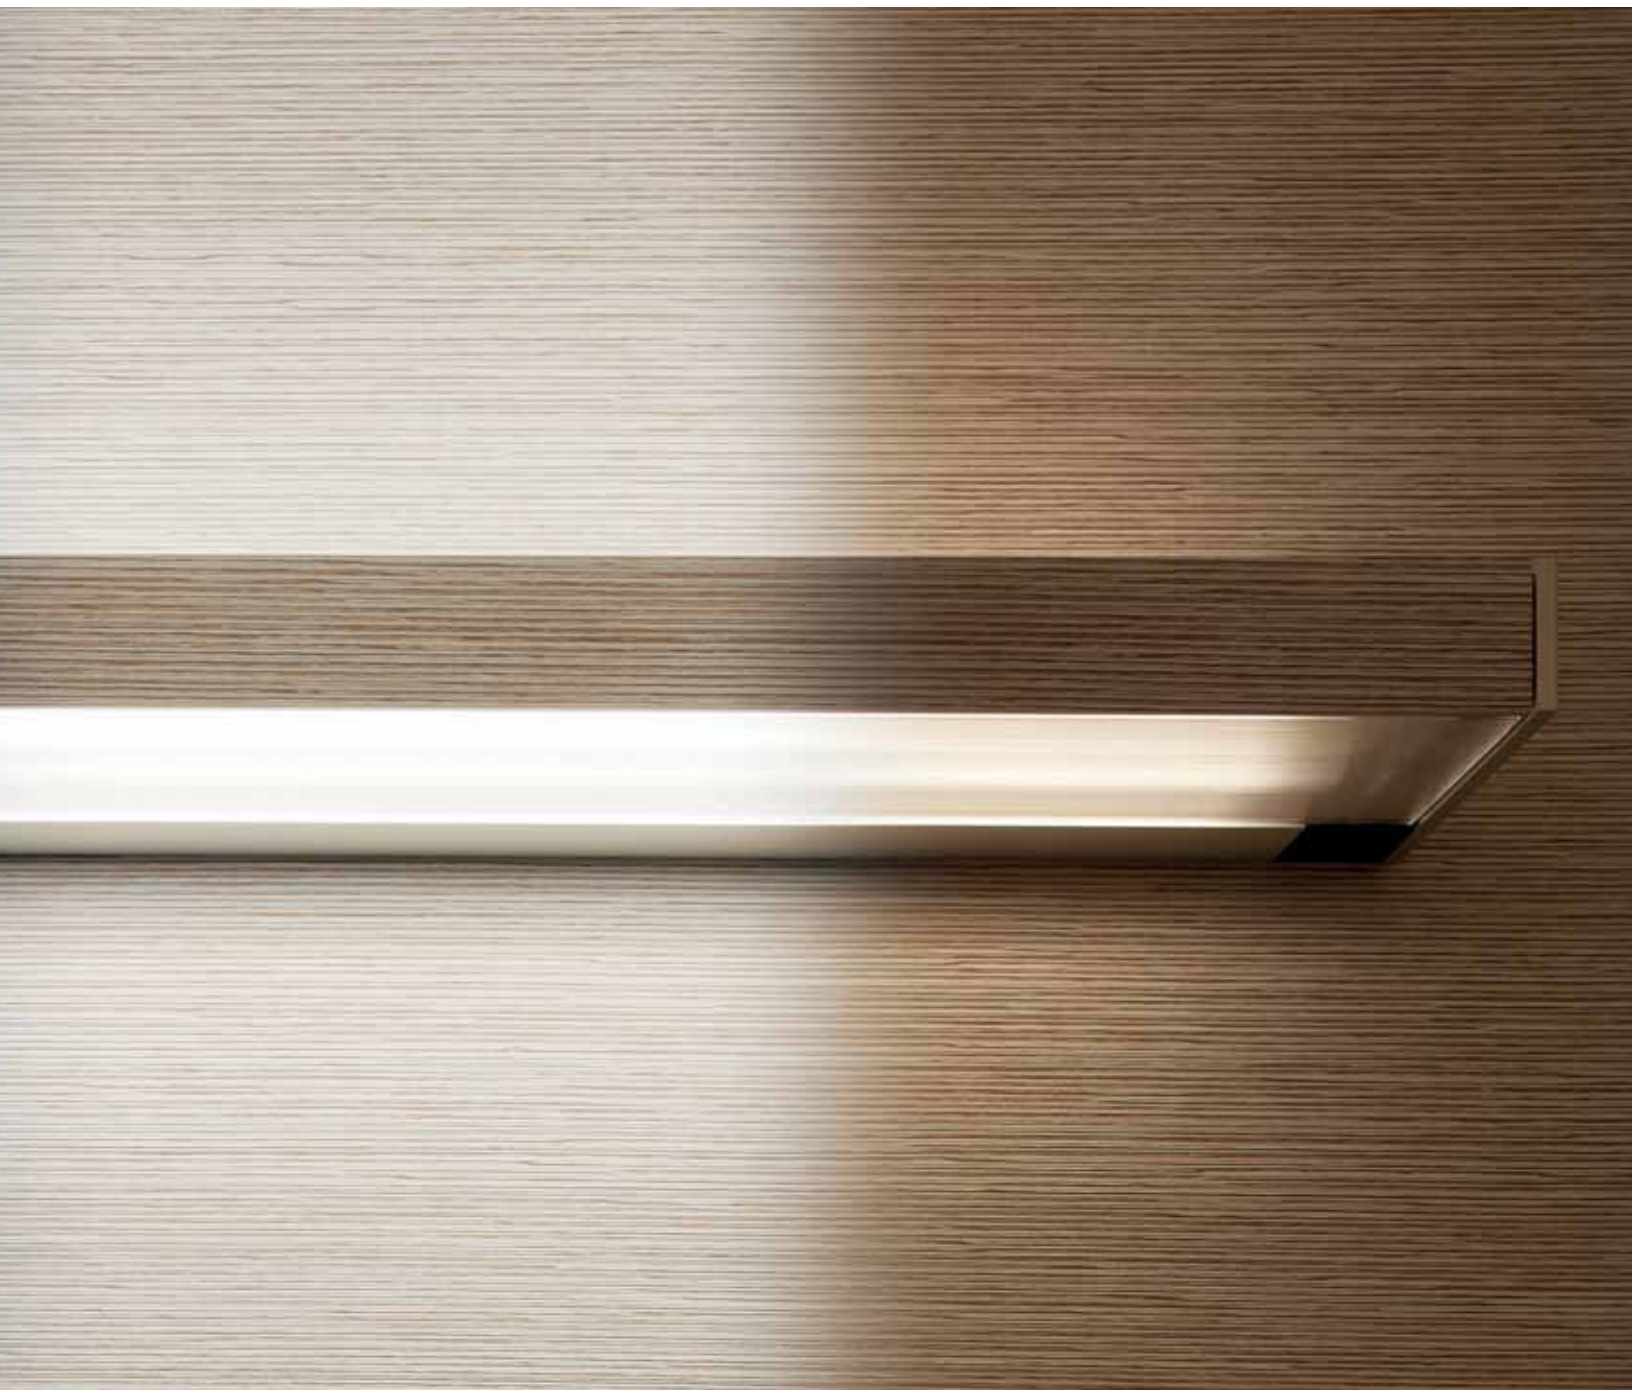

Decorative or Color suggestions:

VTL (VISUAL TIMING LIGHT) LIGHT FOR WELL BEING

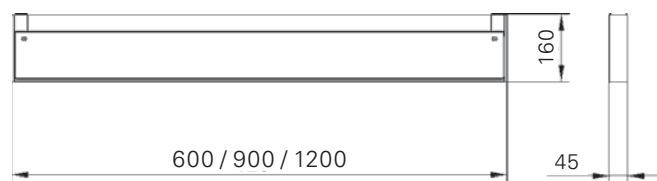

The difference between a bright, sunny day and a gray, dismal one affects the amount of light coming in through windows, skylights, etc. These changes can affect our senses subconsciously; our mood, attitude, productivity. The Visual Timing Light (VTL) System is a valuable tool in modulating the amount of light inside depending on the light coming in throughout the day and night. VTL is available as an option to several Vanera models.
