# MINELA REDEFINES LED:

## LIGHTING QUALITY – ENERGY EFFICIENCY – DESIGN.

Light-emitting diodes in functional areas – Waldmann has been extremely committed to this topic for years. Light-emitting diodes are nearly maintenance-free, durable, consume little power and due to the minimized configuration allow new paths in design. With MINELA, the LED has reached a new milestone in functional lighting. Equipped with a single high-performance LED and featuring minimal energy consumption of 6 W, MINELA illuminates the desk uniformly across a wide area. It produces no distracting shadows on the desk, but instead a very

pleasant and energizing light color. The exact adjustment of the luminaire to individual vision habits only requires one touch: The luminaire head can easily be moved into any desired position. The large range of the support arm allows the luminaire to be set up or fastened outside the writing and reading area and is equally suited for right and left-handed users. The precise lines underscore the trend toward rounded designs and convey the perception of weightlessness. MINELA merges the pronounced ergonomic functionality known for Waldmann, with a

contemporary design and future-oriented lighting technology. MINELA – maximum lighting quality with minimal energy consumption.

**TABLE BASE, ARTICULATED JOINTS,  
SUPPORT ARM.**

Variable adjusting and fastening options due to table base, clamp, or bushing.

Diverse positioning possibilities and automatic fixation of the selected settings through self-locking articulated joints.

**DESIGN, SURFACES.**

Luminaire head, support arm and stand made of premium aluminum. Exquisite and eye-catching powder coating for scratch-resistant and low-reflection surfaces.

**LIGHTING QUALITY, ENERGY EFFICIENCY.**

Multidimensionally adjustable luminaire head with easily accessible on/off switch. Shadowless areal lighting with powerful single LED and only 6 W consumption.
