

**AMADEA® SERIES**

The Amadea® offers an aesthetic design that delivers superior performance for patients and staff. The modular lighting system has a wide-range of applications and fills rooms and corridors with efficient and safe lighting.

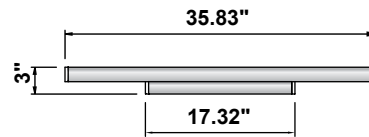

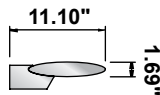

**FEATURES**

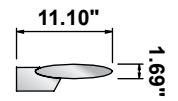

- Extruded aluminum housing and polycarbonate covers are built for high-performance
- Four-way lighting includes indirect, direct exam, night, and an optional reading light
- Assures maximum intensity with T5 HO fluorescent lamps
- Lamps provide 20,000 hours of life and a “warm” 3000K color temperature range
- Night light includes a 7-watt incandescent lamp (Night light requires 120V circuit)
- Electronic ballasts increase energy efficiency, provide flicker-free illumination and are pre-wired for convenient installation
- Available in 48” and 36” length models
- Total lumen output is 9000 lumens for the 2x39-watt (36”) version and 12000 lumens for the 2x54-watt (48”) version when equipped with an optional reading light
- 5-year limited warranty
- Silver finish
- 120-277V is standard

The Vanera® is one of our most innovative lights that has been designed to deliver illumination to healthcare facilities with simple elegance. The Vanera's unique microprism technology provides broad, even light distribution. This wide-angle distribution gives better light illumination in corridor applications which helps eliminate shadows.

#### FEATURES

- Unobtrusive, seamless integration with the architecture
- Minimal reflection and excellent glare reduction
- Utilizes unique microprism technology; wide-angle light distribution with anti-glare technology
- Available in aluminum or silver painted white polymer
- 5-year limited warranty
- 120-277V is standard
- Available in corridor or ceiling models with two 39-watt or 54-watt fluorescent lamps; healthcare room versions (with 39 or 54-watt fluorescent lamps) are also offered
