

HANDHELD MAGNIFIERS

This handheld UV light is superior in magnification and lamp protection. A 4-diopter lens provides excellent inspection capability, and the built-in cover protects patients from direct lamp exposure.

FEATURES:

- UV lamps produce UVA at 340-400nm wavelength for diagnoses of the skin, injury to the eye and general inspection
- 4-diopter lens standard; magnifier viewing area is 2" x 3.63"
- 8-watts total power; 7' cord
- Cover protects patients from direct exposure to lamps
- Plug-in ballast allows for easy portability
- 3-year limited warranty
- 120V is standard; 230V model also available
