

# STE

## UNIVERSAL INDUSTRIAL TASK

### PRODUCT DESCRIPTION:

STE provides an extra-large aluminum housing for maximum light distribution over large work areas and workstations. It features a 55W CFL lamp for bright, wide-area light distribution and very high illuminance levels. Standard lamp color temperature is 5400K (other color temperatures are available). STE is ideal for viewing large schematic drawings, blueprints, technical drawings and inspection/repair documents. The STE also works very well in lab and educational applications, as well as for standard bench

inspection on workstations. The extra long 24.5in luminaire head featuring a built-in parabolic louver provides glare-free illumination and precise light direction. The 36in spring-loaded industrial-grade arm with built-in electronic ballast offers flexibility and precise positioning, as well as locking, thanks to arm and joint design. STE includes a 6-foot cordset with grounded plug for standard 120V operation. With a built-in parabolic louver, STE provides glare-free illumination, precise light distribution and control for the most demanding visual inspection and bench applications.

### FEATURES:

- An extra-wide luminaire head for wide light distribution in large workstations
- 120V standard power connection
- CFL lamp provides long lamp life (10,000 hrs) and excellent CRI (90+ CRI)
- Includes table clamp
- Parabolic micro-grid louver is glare-free
- Articulating arm offers lockable joints for precise positioning over large areas
- Designed for large workstations
- Easy maintenance and cleanability
- Durable, rugged aluminum construction

## PRODUCT INFORMATION

STE-155

Voltage:	120V, 50/60Hz
Lamping:	1 x 55W CFL (5400K)
Luminaire Body:	Aluminum head, powder-coated steel arm
Lamp Shielding:	Metal parabolic louver
Protection Rating:	IP20
Arm System:	36in articulated arm has lockable joints
Switching:	Includes switch
Cord Length:	6ft with plug

For mounting options see page 41

DESCRIPTION	PART #
