

WD/EBL

CFL UNIVERSAL MACHINE

PRODUCT DESCRIPTION:

The WD-213 and EBL-213 “head only” version are constructed with a powder-coated steel housing to resist harsh metalworking machinery and production environments. Both luminaires are IP54 rated for splash protection and are suitable for damp locations. The luminaires include two 13-watt compact fluorescent lamps that offer bright illumination (1800 lumens) and even light distribution. These lamps provide 10,000 hours of lamp life, high energy-efficiency and a balanced color temperature. Designed

as universal machine lights, the WD/EBL Series can be installed on just about any machine. The luminaires are fully gasketed around the diffuser, switch, arm joints and base of the WD-213 to prevent penetration of moisture. A high-impact polycarbonate diffuser protects lamps from coolants, dust and debris. The articulating arm and universal base on the WD-213 allow users the option to mount the light on a vertical or horizontal surface. The EBL is designed with three pre-tapped holes for easy mounting with M6 screws (not included) or for mounting to an optional swivel bracket.

FEATURES:

- Universal mounting for most machines
- Wet location rating of IP54
- Long-term protection against coolants and lubricants with fully gasketed body
- Cast aluminum head resists corrosion
- 120V standard power connection
- Energy-saving CFL lamp provides high output and long lamp life (10,000 hrs)
- Available in 120V only
- Designed for easy mounting with M6 screws (not provided)
- 6.5ft (2m) cord included (EBL model only)

PRODUCT INFORMATION

WD-213

EBL-213

Voltage:	120V, 60Hz
Lamping:	2 x 13W CFL
Operation:	WD-213 includes switch, EBL-213 does not include switch
Luminaire Body:	Powder coated steel
Lens Cover:	Acrylic
Protection Rating:	IP54
Color:	Light gray
Cord Length:	6.5ft (2m)

For mounting options see page 41

DESCRIPTION	PART #
WD-213, 120V, w/34in reach	108 400 001
